

# Swim N Learn

**Description** - Three sessions of Swim N Learn are offered during the summer. Each session averages 35 students. Students have transportation provided to Lava Hot Springs or Pinedale Recreation Center pools where they receive an hour of swim instruction. On the bus ride to the pools students are required to listen to a book for about 20 minutes each trip and write a summary and answer questions each day. Students were given time to practice math facts at their level on the bus. They were given a pre-test at the beginning of the session and then a post-test at the end to see how much they improved.

# Mastery Camp

**Description** - Two Sessions of Mastery Camp were offered. The first session students took a hike in the Wind Rivers, went canoeing and swimming in Fremont Lake. They visited the local Forest Service station which has exhibits, workshops and knowledgeable staff that used games to teach them about the ecosystem they live in. They camped at Granite Hot Springs. Session 2 students packed up to the Lower and Upper Palisades Lakes and camped overnight. Mastery Camp has given our students a chance to learn about nature. They become more comfortable with camping basics such as setting up tents, campfire etiquette, etc. Students also get to enjoy being active in the outdoors and the best part of all is playing capture the flag! Each session had around 20 students participate.

# Etna Enrichment Express

**Description** - Enrichment Express has offered students opportunities to learn and experience a wide variety of classes. This has given students opportunities to experience new things. Some of the classes that have been offered are archery, cooking, photography, basketball, crafts, painting, chess, school plays and many more. We offer 4 - 5 sessions each year and have an average of 130 students enroll each session.
